

## Order full packing units:

- Speeds up all logistic processes tremendously, reduces required packing time and clearly leads to shorter delivery times.

# PFEIFER External Cap, large PFEIFER Screw Cap

Item-No. 05.218

Item-No. 05.219

**PFEIFER**

Thread System

Accessories

PFEIFER External Caps, large are used to seal any PFEIFER Thread Anchors, if the anchors were cast in recessed using PFEIFER Recess Discs or PFEIFER Magnetic Fixing. PFEIFER External Caps, large prevent various substances such as residual concrete, dust, snow etc. from penetrating into the socket, protecting the anchor thread from clogging up, enabling it to be used again in subsequent handling operations.

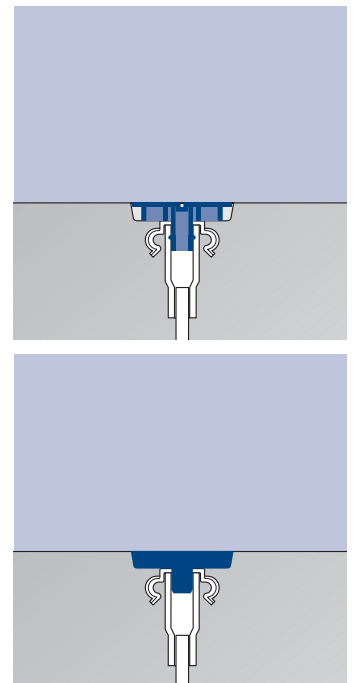

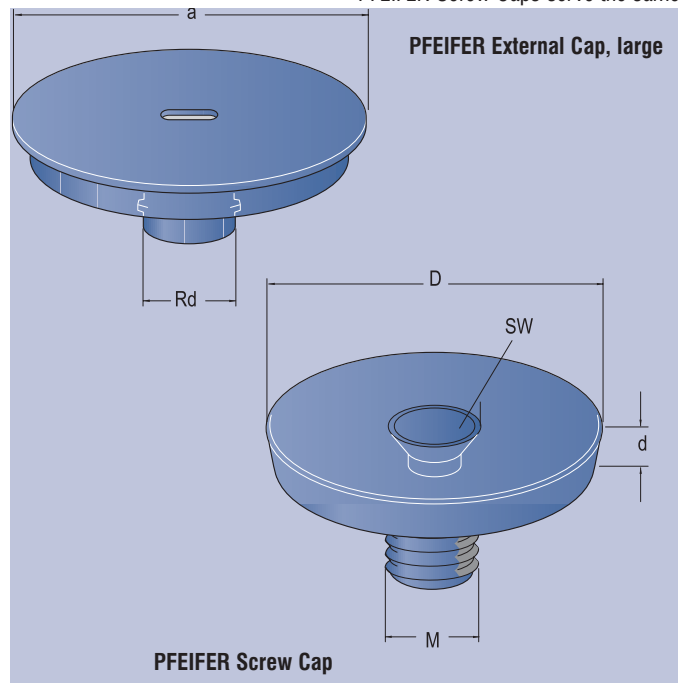

protecting purpose, designed for a permanent and even surfaced sealing. By using an allen screw the Screw Cap can be screwed into the socket and can be unscrewed as well later on. If there is any corrosive atmosphere, the stainless steel type should be used.

In order to preserve the anchor socket, we recommend to lubricate it in both cases.

PFEIFER Screw Caps serve the same

Material PFEIFER External Cap, large:  
Plastic, grey

Material PFEIFER Screw Cap:  
Steel zinc-plated or  
stainless steel 1.4571
